FREESERF PORT · AMIGA RTG · 68040 / 68060 · VERSION 0.131

The Settlers for the Amiga with a Warp card

The 1993 Blue Byte classic at up to 960×540, at full speed, with games over the internet.

Two settlements, mines in the mountains and roads full of carriers: a large game, 960×540.

up to 960×540
7 resolutions, 4:3 and 16:9

50 fps
in a typical game up to 640×480

LAN and internet
two players on two Amigas

3 languages
English, Polish, German

800×600, zoom ×3: a windmill, houses and carriers on the roads.

800×600, zoom ×2: desert with palms and a settlement by the fields.

The Settlers © Blue Byte 1993 – the game data is not part of the port. Freeserf and the port: GPL-3.0.

Gameplay in high resolutions

960×540: settlements on both sides of the desert, roads and windmills.

Frames per second

Measured on an A1200 with a Warp 1260 (68060, 100 MHz), version 0.131, game logic at full speed (50 steps a second).

Medium game (save "terra")

640×480	**50.1**
800×600	**48.4**
800×600 ×2	**48.1**
960×540	**44.7**

Very large game, about 2500 serfs (save "20-last")

640×360	**37.3**
800×600	**19.9**
960×540	**17.6**

The game logic always runs at full speed; in a very large game there are fewer frames. The Large games option chooses between a smooth picture and game speed.

Part of the 960×540 screen: a castle, windmills and houses.

Part of the 960×540 screen: a farm and grain fields.

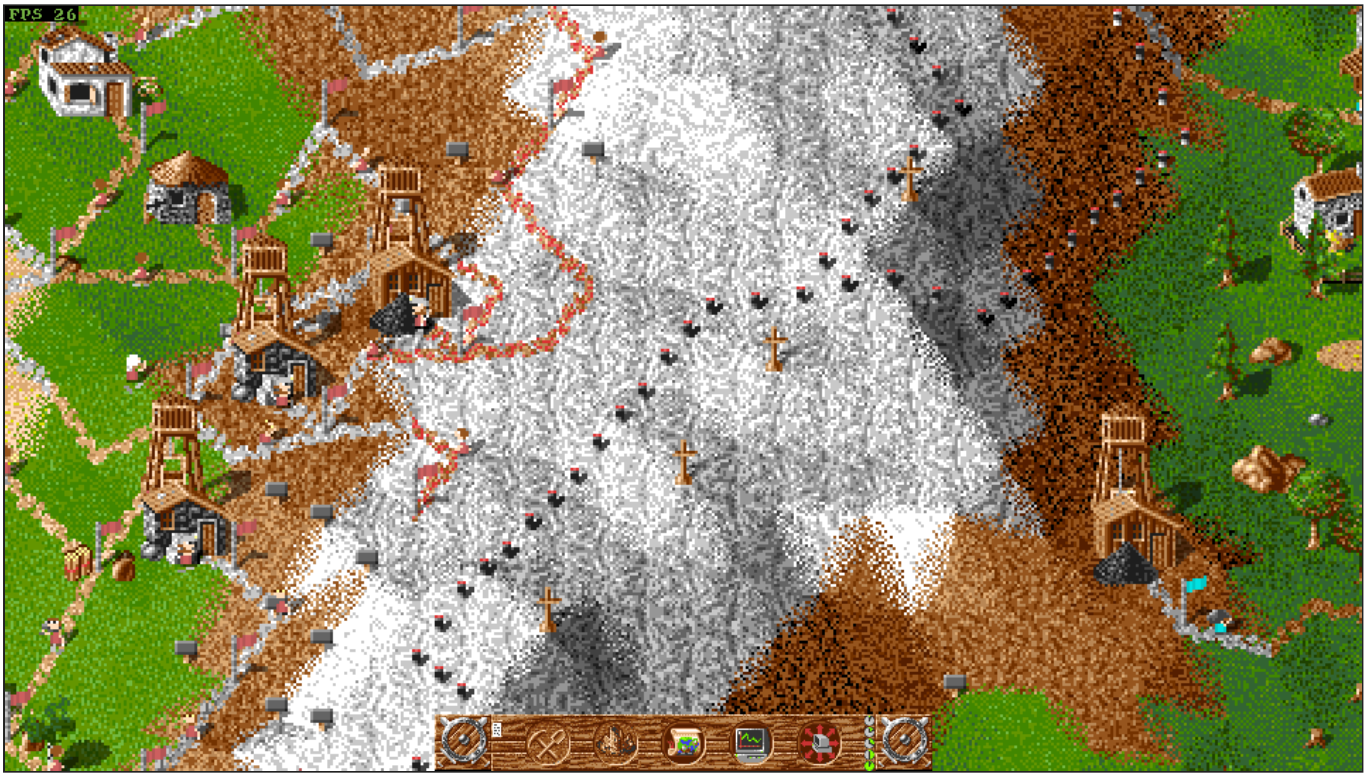

The Settlers © Blue Byte 1993 – the game data is not part of the port. Freeserf and the port: GPL-3.0.

What the port adds

- Resolutions 400×300 … 800×600 and 640×360 / 960×540, map zoom ×2 and ×3
- Two players over a local network and the internet (game server, code, password; no router setup), lobby with chat, LAN saves
- Languages: English, Polish, German; the original font or a readable one
- Sound through Paula or AHI (e.g. the Warp card's audio), separate music and effect volumes
- Game speed ×0.5 … ×3, full pause, quick save, keys for everything
- Map options: amount of sand, rocks and dead trees; Terraforming wasteland: foresters green the desert
- More kinds of trees and wild boars in the forests (looks only)
- The original intro from the Amiga disks before the game
- Bug reports straight from the game: F10, a description, SEND

Compared with the original

Kept	rules, economy, fighting, computer players, graphics, sounds and music from the disks, mouse control
Changed	RTG screen instead of low PAL resolution, saves in the Freeserf format, Esc closes boxes
Instead of the split screen	two players on two Amigas over the network
Default as in the original	every option that changes the game

960×540, zoom ×2: mines and paths in the mountains.

Requirements

Amiga 500 / 1200 / 3000 / 4000 with a Warp card (Warp 560, 1240, 1260, 1260 Extreme, 7060) – the port was made and tested on them. Other Amigas with a 68040/68060 and a Picasso96 card run the game, slower. AmigaOS 3.x, about 32 MB Fast RAM, a TCP/IP stack for network play. The original The Settlers Amiga disks are needed.
